Noble Systems Receives Frost & Sullivan’s Customer Value Leadership Award for WEM Gamification Solutions

Atlanta, GA – August 7, 2018: [Noble Systems Corporation](#), a global leader in omnichannel contact center technology solutions, has received Frost & Sullivan’s **2018 Customer Value Leadership Award for Workforce Engagement Management Gamification Solutions**. Noble received the award based on its continual focus on providing complementary products that enhance employee engagement among today’s workforce, and the company’s overall foresight and strength.

The Frost & Sullivan *North American Customer Value Leadership Awards* are presented to companies that best demonstrate excellence in both customer and business impact, delivering customer value through products and services, offering superior value to customers, and aiding them with increased revenues, profitability, and reduced costs. These two sides work together to make customers feel confident in their products’ quality and value throughout the life of the product.

Noble Systems’ offerings for Workforce Engagement Management and Gamification accelerate its customers’ ability to both differentiate themselves in the market and increase their bottom line. The area of WEM exemplifies how Noble Systems provides significant value to customers, from the company’s [ShiftTrack WFM solution](#), which provides many features that take into account worker preferences, to its new [Noble Gamification](#) product, which brings customers a wealth of benefits, including exceptional agent and supervisor engagement, cost reduction, quick measurable results, and solid return on investment. [Read the full Report](#) to learn more.

“We use a number of specific criteria to evaluate award candidates and assess their fit with select best practice criteria, especially noting an organization’s ability in three key areas: understanding demand, nurturing the brand, and competitive differentiation of its products and services,” said Nancy Jamison, Principal Analyst at Frost & Sullivan. “Frost & Sullivan found that Noble Systems excels in many areas, including its brand longevity and breadth of offering, history of design and innovation, and responsiveness to customer needs. When customers purchase Noble products they feel they are buying the most optimal solution that addresses both their unique needs and their unique constraints.”
