Noble Systems Continues Regional Growth Plans with Key South African Appointment

Atlanta, GA – October 2, 2018: [Noble Systems Corporation](#), a global leader in omnichannel contact center technologies, is pleased to announce further growth within the EMEA region with the appointment of Les Forsman as the Country Manager for South Africa.

Based in Johannesburg, Les will be responsible for leading Noble's sales growth and business expansion in South Africa while overseeing all administrative aspects, including account management for Noble's existing customers, as well as channel partner development and revenue growth. Les has more than 25 years' experience working in the ICT industry where he has held senior executive, leadership, and delivery roles for a range of vendors and systems integrators. He joins Noble from Atio Interactive, where he was business development manager focusing on the financial services sector.

James Riley, VP of Sales & Marketing for Europe, Middle East, Africa & India said, "We are delighted that Les has joined Noble at this pivotal time. Noble has been serving the African market for more than a decade and has a number of key accounts in the region. We see many opportunities for growth in Africa, and are excited by what the future holds. Les's skill set and experience will be invaluable as we increase our footprint and further establish ourselves as the region's leading provider of contact center solutions."

Les added, "It's very exciting to join Noble with its leading edge technology and strong revenue momentum. I look forward to working with our channel partners and customer advocates to deliver world-class contact center solutions to our customers and their channels. With all the change and growth in the South African market, there is no better time or place to be in the communications industry."

About Noble Systems

Noble Systems Corporation is a global leader in the customer communications industry, providing innovative solutions for Contact Center, Workforce Engagement, and Analytics technologies.
